Bookmarking or OCR Cleanup	\$30 per hour
On-site scanning at customer location	Minimum order \$5,000
Document Shredding	\$1.50/cubic ft
CD Creation	\$35 each/\$25 for duplicates

Scanning is an efficient method for creating a digital image from a paper/mylar original. Scanning can produce many different file formats (PDF, TIF, GP4, CAL, etc). Our high-speed document scanner is capable of scanning 8x11 and 11x17 single- and double-sided documents. Our high-speed roll scanner is capable of scanning paper and mylar drawings up to 50 inches in width and unlimited length. Perfect Image, Inc. offers customer on-site scanning where the drawing or documents never have to leave your company.

Standard Microfiche 105 Greyscale	\$0.15	\$0.15	\$0.25	\$0.30

**\$25 MINIMUM CHARGE Shipping Costs Not Included**

#### Additional Services

*Image to Film* - Scanning is an efficient method for creating a digital image from a paper/mylar original. Filming from a digital image will create a clearer and more readable image than filming from original documents. This process is an effective way to get images into a digital state while providing a historical archive on film. Most images are created using a 24x by reduction from originals. Perfect Image can create Diazo and silver duplicates and masters. With most film creation from image data there is a minimum order of \$300.
